SUMMARY

B.Tech CSE student (2028) and Full Stack Development Intern shipping production client websites and web apps with React, Node.js, HTML/CSS and MySQL. Experienced in responsive, mobile-first UI, SEO metadata and URL redirects, front-end performance work (debouncing, batched API calls, Web Workers, offline PWAs), and integrating AI (Gemini, OpenAI, LLM agents, RAG) into real products. Comfortable testing, debugging and documenting changes in a team Git workflow.

EDUCATION

Shri Ram Swaroop Memorial College of Engineering & Management, Lucknow Sep 2024 – Jul 2028
B.Tech, Computer Science & Engineering

EXPERIENCE

Trusting Brains IT Services — Full Stack Development Intern Aug 2026 – Present
Remote · Selected after placing 2nd in the company's Fullstack Intern assessment (via Unstop)

- **Syntellos AI (company website):** rebuilt the React home page, navigation and image-led solution pages; built an admin blog CMS with a rich-text editor, media uploads and newsletter flows; added **SEO metadata** to blog pages and redirected old URLs so existing links kept working; added a lead form with WhatsApp hand-off.
- **Bookshelf.cv (React 19, Express 5, MySQL/TiDB):** authored 40 of 42 commits. Built an **AI shelf-photo scan** with Google Gemini that matches books through batched Open Library queries, cutting matching for a 34-book shelf from ~11 s to 2.5 s; added Google sign-in, Razorpay payments, Goodreads sync, an admin panel and mobile layout fixes.
- **Loan CRM admin panel (React, Node.js, Sequelize, MySQL):** added 400 ms debounced search to every list screen (one API request per search), redesigned the login and Excel import screens to work down to 375 px, and shipped a Lenders & NBFC module with 9 REST endpoints; audited 191 spec features and traced production bugs to root cause.
- **Grow Consultants (marketing site):** built a multi-page React + Vite + Tailwind site with React Router, Framer Motion animations and SEO/Open Graph meta tags, deployed on Vercel.

PROJECTS

ForgeChess — Offline Chess PWA *JavaScript, Vite, Web Workers, WebAssembly, Service Worker* forgechess.vercel.app

- Installable PWA with three chess variants and a from-scratch engine in a Web Worker (230–280k nodes/s in the browser) so the UI never blocks; legal moves verified by perft tests.
- Lazy-loads a 575 KB Stockfish WASM build only when needed and caches it with a service worker, so analysis keeps working offline.

Agent Aegis — CI for AI Agents *Python, FastAPI, React, TypeScript, PostgreSQL* agent-aegis.vercel.app

- Generates a test suite from an AI agent's own prompt and tool schema, runs it in a sandbox and scores reliability across versions, backed by 300+ regression tests and CI checks.

Bracket — Coding Practice Platform *React, TypeScript, Express, Prisma, PostgreSQL* bracketx.vercel.app

- LeetCode-style platform with 73 curated problems, JWT auth, search and lists, a dockable workspace saved per user, and an admin CMS.

Orbit Navigator — Adaptive Learning App *React, FastAPI, Streaming APIs, Vercel* orbit-navigator.vercel.app

- Turns a stated goal into a prerequisite-locked learning route with streaming “Ask AI” chat; hardened with SSE error handling, request timeouts and a 54-test regression suite.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML5, CSS3
Frontend & Mobile Web: React 19, Vite, Tailwind CSS, React Router, Framer Motion, responsive / mobile-first design, PWAs, service workers
Backend: Node.js, Express, FastAPI, Flask, REST APIs, JWT & Google OAuth, Sequelize, Prisma, Razorpay integration
Databases: MySQL / TiDB, PostgreSQL, MongoDB
AI: Gemini & OpenAI APIs, LLM agents, RAG (ChromaDB, LangChain), LangGraph, embeddings, TF-IDF retrieval
Performance & SEO: meta / Open Graph tags, URL redirects, debouncing, request batching, lazy loading, Web Workers, offline caching
Tools: Git, GitHub, GitHub Actions CI, Docker, Vercel, pytest, Node test runner, Chrome DevTools

ACHIEVEMENTS

- Rank 1 (Round 1, score 99.71), HCLTech AMPlified: The AI/ML Challenge 2026 | 1st Runner-Up, TNX CODATHON 2K26
- All India Rank 14, HPE CodeWars 2024 (AIR 50 in 2023) | Winner, Byte Battle 2025 (CSI, SRMCEM)
